

# Karol's Portfolio Project

- The idea for this project is to use this as my actual portfolio page.
  - Have a Loader page, Main page, About page, Education page, Skills page, Projects page, and contact page.
    - Loader Page - Have spinning circles
    - Main Page - Have nav bar at top, my name being typed out, "lets be internet friends with social icons", Arrow pointing down.
    - About page - fade in when scrolled upon, include a link to resume.
    - Education Page - Have cards that displays School and year, then when mouse hovers over list skills learned.
    - Skills Page - Have a skills bar when scrolled upon fills up a certain percentage of comfortability.
    - Projects Page - Using the grid have at least 3 wide - project name with grey overlay on a photo of the project, on hover has read me button, click read me button box pops with details about project have a source code button to go to github code project.
    - Contact Page - Have a form for emails to be reached at, also social icons.
  - Create a trailing cursor?
